

Sustainability Charter

Francis and Lewis International Ltd are committed to a business model based on providing our customers with sustainable steel structures and foundations.

Scope:

The design, manufacture and installation of towers and masts worldwide including foundation solutions (in particular FLI helical piles) bespoke steelwork structures including footbridges, grillages, refuges, walkways, survey, analysis, repair, maintenance and removal of existing structures.

The following principles are observed whilst working within our Environmental Management System:

- Purchase from sustainable sources
- Reduce energy consumption
- Minimise waste whilst maximising reuse and recycling
- Provision of sustainable solutions

Our charter is communicated to all employees on a regular basis and they are reminded that it is every individual's responsibility to assist and use appropriate processes to support the charter and minimise the environmental impact of our business. We strive to inform both our customers and the general public of our commitment to sustainability..

Justine Garbutt
FLI General Manager

A written copy of this charter has been given to all staff and to new employees as part of their induction to FLI. Copies are displayed on notice boards.
